ACTIVITY BASED LEARNING

IoT – Internet of Things

The IoT describes the network of physical objects—“things”—that are embedded with sensors, software, and other technologies for the purpose of connecting and exchanging data with other devices and systems over the internet.

In simple words IoT is a technology through which we can access and control the physical objects (devices) using Internet.

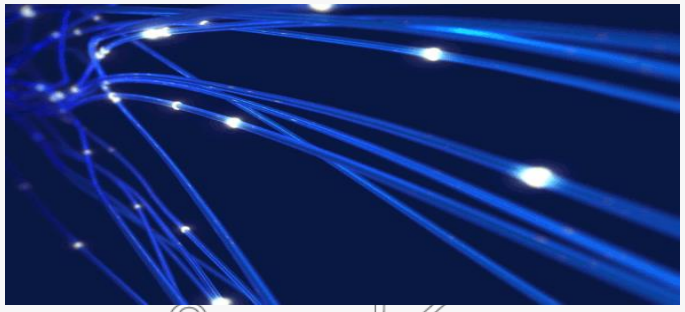
Fundamental Components of IoT

Sensor/Devices

Connectivity

Data Processing



User Interface

Application Domain

IoT is currently found in 4 different popular domain:

- Manufacturing/Industrial Business
- Healthcare
- Security
- Retail
